Missing Features

Tournament Sheet page

Our Client, Josh, told us that this was the lowest priority of all the features

Was not able to get to it

Profile Print PDF

Lower priority

Unable to get to it in time

Badges page

Meaningful badges weren't able to be input in time, we got the percentile values a couple days before an iteration and then moved on.

Final Meeting with Client

Has not taken place yet. Hopefully will be able to meet with Josh later in the week.

Transfer

We do not need to transfer the software, because we did all the work in the repository containing their team website. If they need anything from us, it will be taken care of in the final meeting.

Steps:

Good:

Having a detailed Figma, starting documents helps to have a strong start.

Bad:

Infrequent meetings

Uneven workload

Minimal communication

Missed:

Automated testing

Utilization of Github Projects

Final Thoughts
